

CO₂ Reduction

* This graph uses figures based on the calculation method utilized in the report for the Tokyo global warming alleviation plan.
 * The thermal storage tank energy conservation control system with outside air temperature forecasting, which went into full-scale operation in fiscal 2005, has been recognized as a part of the target measures.
 As a result, the reduction value (204) of the control system is included in the value for the plan's base year of fiscal 2005.
