

## What is the Chinese RoHS?

The Chinese RoHS is formally entitled “Measures for Administration of the Pollution Control of Electronic Information Products.”

Promulgated on February 28, 2006, and went into effect on March 1, 2007.

Mandates the display of content information for six covered substances,\* to promote the control and reduction of environmental pollution caused by disposal of electronic information products, and production and sale of low-pollution electronic information products, and to achieve clean production, boost efficient utilization of resources, safeguard the environment and human health, and promote sustainable development of industry

Furthermore, products registered on the key administrated catalogue are not permitted to contain the six covered substances, and must receive prior certification as products in compliance.

\* Lead (Pb), mercury (Hg), cadmium (Cd), hexavalent chrome (Cr(VI)), polybrominated biphenyl (PBB), and polybrominated diphenyl ether (PBDE)
