

Releases of PRTR Substances

Increased use of alternative substances resulted in a decline of 26 tons in the usage of PRTR substances in fiscal 2007 compared to fiscal 2006, and a decline of 19 tons in releases. This brought the releases per unit of actual production to 0.00005, achieving the target value of 0.00010 set for the target year of fiscal 2011. As a result, a new reduction target will be established during fiscal 2008.

Amounts of PRTR substances handled, released, and transferred in fiscal 2007 (Japan production sites)

(Unit: tons)

Class 1 designated chemical substance	Substance No.	Sites using 1 or more tons of the substance	Amount handled	Amount released		Amount removed	Amount transferred Amount of waste	Amount consumed	Amount recycled
				Atmosphere	Public waters				
2-Amino ethanol	16	3	43.21	0.08		16.09	2.78		24.26
Water-soluble copper salt	207	1	42.84	0.01	0.10				42.73
Theouria	181	1	32.89				32.89		
Xylene	63	1	27.62	12.23			15.39		
Hydrogen fluoride and its water-soluble salts	283	1	8.79	0.04	1.71		1.87		5.16
Ethylbenzene	40	1	6.03	2.65			3.38		
Organotin compounds	176	1	5.98				5.98		
Ethylene glycol	43	2	5.42				5.42		
2-Ethoxyethyl acetate	101	2	5.41	0.78			4.63		
Octylphenyl ether	308	1	3.99				3.99		
Nickel compounds*	232		0.84				0.84		
Lead and its compounds	230		0.15					0.07	0.08
Toluene	227		0.09	0.09					
Bisphenol A epoxy resin	30		0.03					0.03	
Total			183.20	15.88	1.81	16.09	77.08	0.10	72.23

* Nickel compounds are specified class 1 designated chemical substances, and applications were filed since the amount handled was 0.5 tons or more.

Note: Blank columns are treated as zero.
