

## VOC Inputs and Emissions to the Atmosphere (Japan production sites)

Chemical substances corresponding to VOCs are generally used in the Electronic Components segment. Inputs in fiscal 2007 were substantially reduced from fiscal 2006 due to utilization of alternative substances,

### VOC Inputs and Emissions to Atmosphere in fiscal 2007

(Unit: tons)

VOC classifications	Amount handled	Emission to the atmosphere	Remarks
Isopropyl alcohol	108.1	20.4	
Toluene	0.1	0.1	*
Acetone	22.5	10.6	
Butyl acetate	16.3	3.1	
Methanol	0.6	0.6	
Xylene	27.7	12.3	*
Ethanol	23.2	2.5	
Ethylbenzene	8.2	1.8	*
1-methoxy-2-propanol	4.3	0.0	
<b>Total</b>	<b>211.0</b>	<b>51.5</b>
