

Detailed CSR Report

Helping to Build More Sustainable Societies

Casio's greatest responsibility to the world is to deliver another half century of "Creativity and Contribution." Thus far, this report has introduced Casio's efforts to realize its corporate creed, the management priorities that will define the company's future, and its products and technology development initiatives. The rest of the report presents Casio's CSR management system and the company's commitments and initiatives taken for customers, suppliers, employees, local communities, and the global environment.

Fiscal 2008 Highlight 1

Supporting teachers who use scientific calculators to improve the mathematical skills of students worldwide

Society

Casio provides support to enable educators to use scientific calculators more effectively in schools around the world, for the sake of the students who represent the next generation.

Casio is putting into practice its corporate creed of Creativity and Contribution by supporting all the teachers who use the innovative functions of Casio scientific calculators in their classrooms.

Fiscal 2008 Highlight 2

Taking on the challenge of being the world's first to adopt F₂ "clean gas" with a zero global warming factor

Environment

In order to ease global warming, Casio has set the target of reducing its emissions of greenhouse gases other than CO₂ to the same level as fiscal 2000 or below, by fiscal 2010. In 2008, Casio became the first company in the world to succeed in developing a TFT panel manufacturing process using F₂ gas as a substitute for the greenhouse gas SF₆.
