

Design and Procurement

In compliance with global laws and standards, Casio is striving to achieve environmentally compliant product design and green procurement.

Environmental laws and regulations relating to Casio products and green procurement

As a company with operations around the world, Casio must comply with the laws and standards of many different countries.

This is why Casio starts with the design and procurement stages to ensure that its products comply with restrictions on specified chemical substances in parts and materials, while complying with obligations for labeling, information provision and energy-saving standards for finished products.

Covering the procurement stage, Casio has formulated Casio Green Procurement Standards to cover the legal regulations for the chemical substances contained in Casio products, and is procuring its parts and materials in accordance with those standards. To ensure that Casio products comply with the latest laws and standards around the world, the Casio Green Procurement Standards are constantly reviewed and updated. Thus, by procuring parts and materials that meet its own strict standards, Casio can be confident that its product development meets legal requirements worldwide. Casio also ensures the compliance of its products by scientifically verifying and analyzing the content of chemical substances in parts and materials used.

In the design stage, the company confirms that all parts and materials that will go into a completed Casio product meet the Casio Green Procurement Standards. Products are approved for production only after confirmation using a database of the chemical substances contained in procured materials.

Casio selects recyclable materials and provides symbol marks and the necessary information to ensure separate collection, complying with the relevant laws and standards worldwide on product recovery and recycling as well as on chemical substances contained in products.

In response to laws and regulations requiring more energy-saving designs (such as the ErP Ecodesign Directive), Casio is creating technical documents and other internal standards.

The table below shows the principal environmental laws relating to the distribution of Casio products in countries around the world.

Major environmental laws and regulations related to Casio products

(as of May 2015)

	Product			Packaging		Battery	
	Collection and Recycling	Hazardous Substances	Energy conservation	Collection and Recycling	Hazardous Substances	Collection and Recycling	Hazardous Substances
EU	WEEE	RoHS REACH Biocidal Products Regulations	ErP	EU Directive on Packaging and Packaging Waste		Batteries directive	
Norway		Chemical substance regulations					
Turkey	Turkey WEEE & RoHS		Turkey ErP	Turkey packaging regulations		Turkey batteries regulations	
Serbia	Serbia WEEE & RoHS					Serbia batteries directive	
Ukraine		Ukraine RoHS					
Customs Union (Eurasian Economic Commission)		Customs Union: RoHS (draft)	Customs Union: ErP (draft)				

US	Each state's TV/PC recycling laws	Each state's mercury regulations, California Proposition 65, California SB50, California regulations on formaldehyde, safer consumer product regulations	US federal law, and external power supply efficiency regulations in each state	California's Rigid Plastic Packaging Container recycling program, and rigid plastic container labeling regulations in each state	Each state's packaging and heavy metal regulations	Each state's rechargeable battery recycling regulations	
Canada	Each state's electric appliance recycling regulations	Products Containing Mercury Regulations	External power energy efficiency regulations	Each state's packaging material collection programs			Products Containing Mercury Regulations
Mexico			Energy consumption labeling regulations				
Brazil	Brazil's Solid Waste Law			Brazil's Solid Waste Law		Brazil's Solid Waste Law	Brazil batteries regulation
Argentina	Argentina WEEE (draft)					Argentina WEEE (draft)	Argentina batteries regulation
Peru	Peru WEEE						
Paraguay							Paraguay batteries regulations
Columbia						Columbia batteries regulations	Columbia batteries regulations
Israel	Israel WEEE (draft)			Israel packaging regulations			
Jordan	Jordan WEEE (draft)	Jordan RoHS (draft)	Jordan ErP				
UAE		UAE RoHS (draft)					
China	China WEEE	China RoHS		China RoHS			Dry-Cell Battery Mercury Regulations
South Korea	South Korea RoHS/WEEE/ELV		South Korea Energy Conservation Law	South Korea Recycling Law		South Korea Recycling Law	South Korea batteries regulations
Taiwan						Battery recycling regulations	Regulations on heavy metal in batteries

Australia			External power energy efficiency regulations				
India	India's e-waste law						
Viet Nam	Viet Nam WEEE	Viet Nam RoHS				Viet Nam WEEE	
Indonesia	Household waste regulations						
Singapore		Singapore RoHS (draft)					
Japan	Recycling Law	Recycling Law (J-Moss)	Energy Conservation Law	Container and Packaging Recycling Law		Recycling Law	
Global conventions		Convention on Persistent Organic Pollutants (POPs), Mercury Convention			Convention on POPs		Mercury Convention

As an initiative to help prevent climate change in the procurement stage, Casio requests suppliers not to use greenhouse gases in the manufacturing process, and also to ascertain and reduce their emissions of CO2. In the development and design stages, Casio promotes product development by setting targets that surpass its competitors' products with the best energy consumption efficiency in the same category.
